

Opening talk

Porcine CD4+ T lymphocytes and their contribution to an effective immune response after vaccination"

Prof. Armin SAALMULLER, University of Veterinary Medicine, Vienna, Austria

Keynote lectures

TRIM antiviral mechanisms across vertebrates

Dr. Pierre BOUDINOT, INRA, Jouy-en-Josas, France

Resistance to mammary infections in ruminants: the unexpected role of SOCS2 on the immune mechanisms and beyond

Prof. Gilles FOUCRAS, ENVT, Toulouse, France

Immunobiology in vaccine development against gastrointestinal nematodes of sheep

Dr. Alasdair NISBET, Moredun Research Institute, Edinburg, United-Kingdom

Environmental effects on maternal and offspring immune functions

Prof. Volker STEFANSKI, University of Hohenheim, Stuttgart, Germany
